SPERGER

The new outstanding seed treatment by dusting for the prevention of seed born diseases and fungi causing low germination of seed. It is non-poisonous and does not harm the seed under any conditions of soil, moisture or temperature, according to results to date. It can be used for all kinds of seed. You will be pleased and surprised with the results.

Above grasses are for delivery in September to November 1947, our option.

We now have our new Corn Processing Plant in operation in San Antonio. This plant is equipped with the finest cleaning, sizing, grading, and treating equipment available. It was built primarily to handle corn with the aim of supplying our customers with the best corn grown. ASGROW quality corn will be second to none. Not only are we sizing and grading our Hybrid Corn, but we feel the need of the same type processing for Open-Pollinated varieties. Therefore, this year, ASGROW Hybrid and Open-Pollinated Corn will be processed to uniform length, breadth, and thickness. This uniform seed will enable the grower to adjust his planter and get an even rate of planting throughout his field. This will give far better stands and more uniform crops.

Write your nearest ASGROW office and they will book your requirements.

Yours very truly,

Associated Seeds, Inc
